

# Compare Motion Profiles and Closed Loop Control

## PI with Velocity and Acceleration Feedforwards

$$\sum_n \left[ (r_n)_0 - (x_n)_0 \right]^2 = 9.749379$$

$$K = 1.2$$

$$\zeta = 0.333333$$

$$\omega_n = 125.663706$$

Open loop parameters

$$K_i = 314.771334$$

$$K_p = 31.028076$$

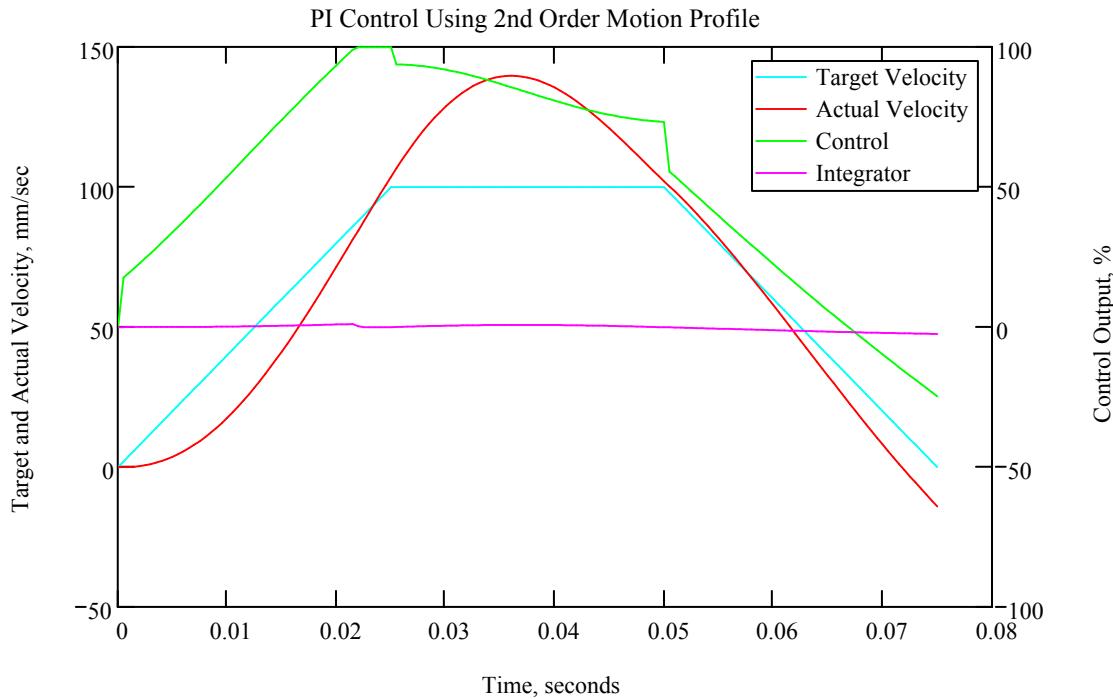

Closed loop gains

$$K_v = 0.833333$$

$$K_a = 0.004421$$

Feedforwards

## Compare Motion Profiles and Closed Loop Control

Notice that the velocity lags then over shoots the target when the ramps change.
